SOIL DRENCH – INSECT / DISEASE MANAGEMENT

Do you have a tree that is being attacked by pests such as aphids, leaf miners and more or disease?

By using techniques such as soil drenching we are able to apply product to the base of the plant or tree (root zone) to provide targeted, deep penetration, to help improve its health. This can also help control pests. Soil Drenches are applied early in the Spring and up to mid May.

We also offer the following tree care services: Tree & Shrub Deep Root Fertilization; Tree Pruning; and Hedge Trimming.
